Schema	dbo (31 user tables)

31	359	28	7	44
User Tables	Columns	Primary Keys	Unique Constraints	Foreign Keys

Generated automatically from a SQL Server schema extract · 0 check constraints · 0 default constraints

1. Overview

This report documents the structure of the **AdventureWorksDW2025** data warehouse: its tables, columns, and the constraints that tie them together. The database follows a classic star-schema design, with dimension tables (prefixed `Dim`) surrounding fact tables (prefixed `Fact`) that record measurable business events such as internet sales, reseller sales, and call-center activity.

Constraint Summary

Constraint Type	Count
Primary keys	28
Unique constraints	7
Foreign keys	44 (45 column references)
Check constraints	0
Default constraints	0

Example Data Entry (Context)

A real record from the largest fact table, `FactInternetSales`, joined to its related dimension rows, illustrates how the star schema works in practice:

Field	Value	Description
`SalesOrderNumber`	`SO43697`	Order identifier (part of composite PK with line number)
`SalesOrderLineNumber`	`1`	Line number
`OrderDateKey / FullDateAlternateKey`	`20101229 / 2010-12-29`	FK to DimDate (Order Date)
`ProductKey`	`310`	FK to DimProduct
`DimProduct.EnglishProductName`	`Road-150 Red, 62`	Related dimension value
`CustomerKey`	`21768`	FK to DimCustomer
`DimCustomer.Name`	`Cole Watson`	Related dimension value
`OrderQuantity`	`1`	Fact measure
`UnitPrice`	`3578.27`	Fact measure (money)

Field	Value	Description
SalesAmount	3578.27	Fact measure (money)

This shows how a fact row uses surrogate keys (ProductKey, CustomerKey, OrderDateKey) to join to the dimension tables in the star schema.

2. Columns by Table

359 columns across all 31 tables, listed below in schema order. Each entry shows the column's data type, storage length, numeric precision/scale, nullability, and whether it is an identity (auto-increment) column.

AdventureWorksDWBuildVersion (2 columns)

#	Column	Data Type	Max Len	Precision	Scale	Nullable	Identity
1	DBVersion	nvarchar	100	0	0	YES	NO
2	VersionDate	datetime	8	23	3	YES	NO

DatabaseLog (8 columns)

#	Column	Data Type	Max Len	Precision	Scale	Nullable	Identity
1	DatabaseLogID	int	4	10	0	NO	YES
2	PostTime	datetime	8	23	3	NO	NO
3	DatabaseUser	sysname	256	0	0	NO	NO
4	Event	sysname	256	0	0	NO	NO
5	Schema	sysname	256	0	0	YES	NO
6	Object	sysname	256	0	0	YES	NO
7	TSQL	nvarchar	-1	0	0	NO	NO
8	XmlEvent	xml	-1	0	0	NO	NO

DimAccount (10 columns)

#	Column	Data Type	Max Len	Precision	Scale	Nullable	Identity
1	AccountKey	int	4	10	0	NO	YES
2	ParentAccountKey	int	4	10	0	YES	NO
3	AccountCodeAlternateKey	int	4	10	0	YES	NO
4	ParentAccountCodeAlternateKey	int	4	10	0	YES	NO
5	AccountDescription	nvarchar	100	0	0	YES	NO
6	AccountType	nvarchar	100	0	0	YES	NO
7	Operator	nvarchar	100	0	0	YES	NO
8	CustomMembers	nvarchar	600	0	0	YES	NO
9	ValueType	nvarchar	100	0	0	YES	NO
10	CustomMemberOptions	nvarchar	400	0	0	YES	NO

DimCurrency (3 columns)

#	Column	Data Type	Max Len	Precision	Scale	Nullable	Identity
1	CurrencyKey	int	4	10	0	NO	YES
2	CurrencyAlternateKey	nchar	6	0	0	NO	NO
3	CurrencyName	nvarchar	100	0	0	NO	NO

DimCustomer (29 columns)

#	Column	Data Type	Max Len	Precision	Scale	Nullable	Identity
1	CustomerKey	int	4	10	0	NO	YES
2	GeographyKey	int	4	10	0	YES	NO
3	CustomerAlternateKey	nvarchar	30	0	0	NO	NO
4	Title	nvarchar	16	0	0	YES	NO
5	FirstName	nvarchar	100	0	0	YES	NO

4	version	int	4	10	0	YES	NO
5	definition	varbinary	-1	0	0	YES	NO

3. Primary Keys

28 primary key constraints, one per table (all named explicitly except the system-generated `sysdiagrams` key).

Table	Constraint
DatabaseLog	PK_DatabaseLog_DatabaseLogID
DimAccount	PK_DimAccount
DimCurrency	PK_DimCurrency_CurrencyKey
DimCustomer	PK_DimCustomer_CustomerKey
DimDate	PK_DimDate_DateKey
DimDepartmentGroup	PK_DimDepartmentGroup
DimEmployee	PK_DimEmployee_EmployeeKey
DimGeography	PK_DimGeography_GeographyKey
DimOrganization	PK_DimOrganization
DimProduct	PK_DimProduct_ProductKey
DimProductCategory	PK_DimProductCategory_ProductCategoryKey
DimProductSubcategory	PK_DimProductSubcategory_ProductSubcategoryKey
DimPromotion	PK_DimPromotion_PromotionKey
DimReseller	PK_DimReseller_ResellerKey
DimSalesReason	PK_DimSalesReason_SalesReasonKey
DimSalesTerritory	PK_DimSalesTerritory_SalesTerritoryKey
DimScenario	PK_DimScenario
FactAdditionalInternationalProductDescription	PK_FactAdditionalInternationalProductDescription_ProductKey_CultureName
FactCallCenter	PK_FactCallCenter_FactCallCenterID
FactCurrencyRate	PK_FactCurrencyRate_CurrencyKey_DateKey
FactInternetSales	PK_FactInternetSales_SalesOrderNumber_SalesOrderLineNumber
FactInternetSalesReason	PK_FactInternetSalesReason_SalesOrderNumber_SalesOrderLineNumber_SalesReasonKey
FactProductInventory	PK_FactProductInventory

Table	Constraint
FactResellerSales	PK_FactResellerSales_SalesOrderNumber_SalesOrderLineNumber
FactSalesQuota	PK_FactSalesQuota_SalesQuotaKey
FactSurveyResponse	PK_FactSurveyResponse_SurveyResponseKey
ProspectiveBuyer	PK_ProspectiveBuyer_ProspectiveBuyerKey
sysdiagrams	PK__sysdiagr__C2B05B616B24EA82

4. Unique Constraints

7 unique constraints (alternate keys), enforcing business-key uniqueness alongside each table's surrogate primary key.

Table	Constraint
DimProduct	AK_DimProduct_ProductAlternateKey_StartDate
DimProductCategory	AK_DimProductCategory_ProductCategoryAlternateKey
DimProductSubcategory	AK_DimProductSubcategory_ProductSubcategoryAlternateKey
DimPromotion	AK_DimPromotion_PromotionAlternateKey
DimReseller	AK_DimReseller_ResellerAlternateKey
DimSalesTerritory	AK_DimSalesTerritory_SalesTerritoryAlternateKey
FactCallCenter	AK_FactCallCenter_DateKey_Shift

5. Foreign Keys

45 foreign keys (45 column references — one composite FK spans two columns), defining the relationships between fact, dimension, and hierarchy tables.

Table	Constraint	Column	Referenced Table	Referenced Column
DimAccount	FK_DimAccount_DimAccount	ParentAccountKey	DimAccount	AccountKey
DimCustomer	FK_DimCustomer_DimGeography	GeographyKey	DimGeography	GeographyKey
DimDepartmentGroup	FK_DimDepartmentGroup_DimDepartmentGroup	ParentDepartmentGroupKey	DimDepartmentGroup	DepartmentGroupKey
DimEmployee	FK_DimEmployee_DimEmployee	ParentEmployeeKey	DimEmployee	EmployeeKey
DimEmployee	FK_DimEmployee_DimSalesTerritory	SalesTerritoryKey	DimSalesTerritory	SalesTerritoryKey
DimGeography	FK_DimGeography_DimSalesTerritory	SalesTerritoryKey	DimSalesTerritory	SalesTerritoryKey
DimOrganization	FK_DimOrganization_DimCurrency	CurrencyKey	DimCurrency	CurrencyKey
DimOrganization	FK_DimOrganization_DimOrganization	ParentOrganizationKey	DimOrganization	OrganizationKey
DimProduct	FK_DimProduct_DimProductSubcategory	ProductSubcategoryKey	DimProductSubcategory	ProductSubcategoryKey
DimProductSubcategory	FK_DimProductSubcategory_DimProductCategory	ProductCategoryKey	DimProductCategory	ProductCategoryKey

Table	Constraint	Column	Referenced Table	Referenced Column
DimReseller	FK_DimReseller_DimGeography	GeographyKey	DimGeography	GeographyKey
FactCallCenter	FK_FactCallCenter_DimDate	DateKey	DimDate	DateKey
FactCurrencyRate	FK_FactCurrencyRate_DimCurrency	CurrencyKey	DimCurrency	CurrencyKey
FactCurrencyRate	FK_FactCurrencyRate_DimDate	DateKey	DimDate	DateKey
FactFinance	FK_FactFinance_DimAccount	AccountKey	DimAccount	AccountKey
FactFinance	FK_FactFinance_DimDate	DateKey	DimDate	DateKey
FactFinance	FK_FactFinance_DimDepartmentGroup	DepartmentGroupKey	DimDepartmentGroup	DepartmentGroupKey
FactFinance	FK_FactFinance_DimOrganization	OrganizationKey	DimOrganization	OrganizationKey
FactFinance	FK_FactFinance_DimScenario	ScenarioKey	DimScenario	ScenarioKey
FactInternetSales	FK_FactInternetSales_DimCurrency	CurrencyKey	DimCurrency	CurrencyKey
FactInternetSales	FK_FactInternetSales_DimCustomer	CustomerKey	DimCustomer	CustomerKey
FactInternetSales	FK_FactInternetSales_DimDate	OrderDateKey	DimDate	DateKey
FactInternetSales	FK_FactInternetSales_DimDate1	DueDateKey	DimDate	DateKey
FactInternetSales	FK_FactInternetSales_DimDate2	ShipDateKey	DimDate	DateKey
FactInternetSales	FK_FactInternetSales_DimProduct	ProductKey	DimProduct	ProductKey
FactInternetSales	FK_FactInternetSales_DimPromotion	PromotionKey	DimPromotion	PromotionKey
FactInternetSales	FK_FactInternetSales_DimSalesTerritory	SalesTerritoryKey	DimSalesTerritory	SalesTerritoryKey
FactInternetSalesReason	FK_FactInternetSalesReason_DimSalesReason	SalesReasonKey	DimSalesReason	SalesReasonKey
FactInternetSalesReason	FK_FactInternetSalesReason_FactInternetSales	SalesOrderNumber	FactInternetSales	SalesOrderNumber
FactInternetSalesReason	FK_FactInternetSalesReason_FactInternetSales	SalesOrderLineNumber	FactInternetSales	SalesOrderLineNumber
FactProductInventory	FK_FactProductInventory_DimDate	DateKey	DimDate	DateKey
FactProductInventory	FK_FactProductInventory_DimProduct	ProductKey	DimProduct	ProductKey
FactResellerSales	FK_FactResellerSales_DimCurrency	CurrencyKey	DimCurrency	CurrencyKey
FactResellerSales	FK_FactResellerSales_DimDate	OrderDateKey	DimDate	DateKey
FactResellerSales	FK_FactResellerSales_DimDate1	DueDateKey	DimDate	DateKey
FactResellerSales	FK_FactResellerSales_DimDate2	ShipDateKey	DimDate	DateKey

Table	Constraint	Column	Referenced Table	Referenced Column
FactResellerSales	FK_FactResellerSales_DimEmployee	EmployeeKey	DimEmployee	EmployeeKey
FactResellerSales	FK_FactResellerSales_DimProduct	ProductKey	DimProduct	ProductKey
FactResellerSales	FK_FactResellerSales_DimPromotion	PromotionKey	DimPromotion	PromotionKey
FactResellerSales	FK_FactResellerSales_DimReseller	ResellerKey	DimReseller	ResellerKey
FactResellerSales	FK_FactResellerSales_DimSalesTerritory	SalesTerritoryKey	DimSalesTerritory	SalesTerritoryKey
FactSalesQuota	FK_FactSalesQuota_DimDate	DateKey	DimDate	DateKey
FactSalesQuota	FK_FactSalesQuota_DimEmployee	EmployeeKey	DimEmployee	EmployeeKey
FactSurveyResponse	FK_FactSurveyResponse_CustomerKey	CustomerKey	DimCustomer	CustomerKey
FactSurveyResponse	FK_FactSurveyResponse_DateKey	DateKey	DimDate	DateKey

6. Notes

- Check and default constraints: none exist in this database.
- DimDate uses a natural key (DateKey) with no identity or alternate-key constraint.
- Composite primary keys are used on several fact tables (e.g. FactInternetSales = SalesOrderNumber + SalesOrderLineNumber).
- Self-referencing foreign keys model parent-child hierarchies on DimAccount, DimDepartmentGroup, DimEmployee, and DimOrganization.
- FactInternetSales and FactResellerSales each have three foreign keys to DimDate for Order/Due/Ship dates.
- FactInternetSalesReason has a composite FK (SalesOrderNumber + SalesOrderLineNumber) back to FactInternetSales.
